TITLE : ROTARY DEVELOPING DEVICE

ABSTRACT : PURPOSE: To facilitate maintenance and management by attaching freely attachably and detachably each developing unit to a rotating body.

CONSTITUTION: A rotary developing device 100 is provided with a rotating body 300, which is supported in a copying machine freely rotatably through a revolving shaft 320, and plural developing units 101~104 attached freely attachably and detachably to and from the rotating body 300. Developing units 101~104 are stored in developing unit storage chambers 325a~325d of the rotating body 300 and are supported by rails 321 placed on and under developing units. When the developing unit is set to the rotating body 300, pins 211a and 210a in the deep side of the developing unit are fitted to guide grooves 321a of upper and lower rails, and the developing unit is pressed in along guide grooves 321a.
